

# ASM SCIENCE FAIR UPDATE

Happy Friday Everybody,

I would like to start by saying that I have been very impressed with how responsible the students have been in completing their checkpoints on time and the amazing parental support that has been going on at home. I realize that according to the calendar, we should be completing Checkpoint #6 next Monday and yet we are only on Checkpoint #4. This is nothing to worry about and I have made the deadlines more fluid to accommodate all of the different experiments which require different amounts of time, the ordering of materials, and other such variables that made sticking to our original timeline a near impossibility. With this in mind, my new timeframe will be as follows...

Date	Objective & Comments
April 30	Experiments Completed. If extra time is needed, email me an approximate date of completion. April 30 we will organize data in class for Io, Europa, and Callisto and May 2 for Ganymede.
May 7	Poster Rough Draft Due. This can be accomplished for the most part, even if experiments aren't fully finished. A lot of the poster work is formatting and inserting info from earlier checkpoints.
May 10	Checkpoint #7 (Poster Final Draft Due). Don't worry about Checkpoint # 5 and 6 because it is a part of Checkpoint #7.

Thank you for your time and I hope you all have an excellent weekend. If you have any questions, do not hesitate to email me. Regards,

Mr. Schantz
